#### No. 350 -- NATIONAL INCOME AND INCOME PAID OUT: 1929 TO. 1939

NOTE. National income produced is not value of commodities produced and services rendered (gross value less expenditures for materials and interindustry services - such as transportation and communication-used in productive processes, for taxes, and for depreciation of capital equipment). Income paid out is amount actually distributed to individuals as salaries, wages, interest, dividends, entreproneurial withdrawals, and net rents and royalties. Imputed income from ownership of durable goods (including owned homes), imputed value of scryices of members of family, earnings from odd jobs, direct relief and charity, carnings from illegal pursuits, and changes value of assets not derived by groups professionally engaged in handling of assets are not included eithern income produced or in income paid out. Business savings (positive or negative) represent difference between income produced and income paid out

I Data on dividends, interest, and corporate savings by industrial divisions for 1934and for subsequent years are based on a different industrial classification than are the estimates of these items for carlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Rovenue permitted the making of estimates for 1934 on the carlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small. The 2 estimates were averaged in compiling this table.

No. 355. CONSUMER EXPENDITURES AGGREGATE AND AVERAGE OUTLAY OF FAMILIES AND SINGLE INDIVIDUALS FOR CONSUMPTION, GIFTS AND PER-SONAL TAXES, AND SAVINGS, BY INCOME LEVEL: 1935-36

NOTE. These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases (see headnote, table 354), supplemented by data from various other sources. The estimates applyto the 12-month period from July 1935 through June 1936, and cover all families and single individ-uals in United States. A family is defined as 2 or more persons sharing a common income and living underthæmmon roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families

GENERAL NOTE. The wholesale-price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926, 813 beginning January 1938, and 863 beginning March 1940; as smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which both farm products and odds. However, in computing the index for all commodities such articles were counted only once.

The reteil-food-cost indexes presented in this section for periods beginning January 1935 are revised indexes based on the distribution—expenditures as shown by the 1934-65 study made by the Bureau Labor Statistics of expenditures 12 wage earners and lower salaried workers families. Differences 12 changes in retail-food costs as shown by the revised, as compared with the unrevised, data are due largely to therelatively greater importance of cirrus fruits and green vegetables and the lesser importance of ferrelatively greater importances of cirrus fruits and green vegetables and the lesser importance of ererelatively greater importances of cirrus fruits and green vegetables and the lesser importance of ererelatively greater in the second second control of the second control of the control of

The farm-price index is based on prices paid to producers hard major crops and, beginning 1924, also 13 commercial truck crops. Average quotations for the period August 1909-July 1914 are used a base, and each price series is weighted by the average annual marketings of farmers in 1924 years 1924 to 1929.

# No. 366. PRICES, WHOLESALE INDEXES, ALL COMMODITIES AND BY ECONOMIC CLASSES: 1916 TO 1940

NOTE: Figures in boxes indicate number of quotations. As orginally published, Bradstreet's "Index" is the sum of the prices per pound of 96 commodities; Dun's represents the aggregate cost per capital of a year's supply of approximately 300 commodities included. In the following table, both series have been expressed This percentage of 1926 by the Bureau of Foreign and Domestic Commerce. Indexs of the National Bureau of Economic Research for 1916 to 1928 are invegigated geometric moans for approximately 490 commodities (converted from a 1915 base to a 1928 base by the Bureau of Foreign the weights being basedupon the average value of praduction in 1927 and 1931. For method of computing the Department of Labor index, see general note, p. 322

Effective March 1940. In earlier yearsa smallernumber of commodities was included.

Number of rejuotations used beginning 1929-secheadnot regarding earlier years. The sum of the number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

Beginning December 1937, discontinued by reporting source.

No. 367.— COST OF GOODS PURCHASED BY WAGE EARNERS AND LOWBR-SALARIED WORKERS IN 33 LARGE CITIES COMBINED. INDEXES: 1913 TO 1940. Continued.

## 14. WAGES, HOURS OF LABOR, AND EMPLOYMENT

[Data in this section relate to continental United States, except as noted. For data relating to hours of labor, wages, and employment shown in other sections, consult the indexi

No. 874.- HOURS AND EARNINGS, AVERAGE, IN SELECTED MANUFACTURING INDUSTRIES: 1935 TO 1939

NOTE. The averages in this table are based on monthly data supplied by representative establishments in the respective industries. As the number of such establishments varies slightly from month to month, the averages for different years are not in all cases strictly somparable; but the reporting "samples" are, in general, large enoughtoble representative of the industries. The average weekly earnings do not represent full-time earnings, inasmuch as the data from which they are computed coverboth full-time and part-time workers. The average weekly four-stand average hourly earnings are derived from somewhat smaller samples than the average weekly earnings, and therefore the product obtained by mustipiying the hours by the hourly earnings is not identical with the average weekly earning.

# No. 375. EARNINGS, AVERAGE WEEKLY, IN MANUFACTURING INDUSTRIES; C'OST OF LIVING; WEEKLY EARNINGS ADJUSTED TO COST OF LIVING—INDEXES: 1922 TO 1939

NOTR.-1923-25 average-100. The indexesofaverage weekly earnings in this table are derived from the employment andpay-rollindexesshown intable 379. The costofliving are those shown intable 367,p328, converted to 21923-25base. The Significance interest is a converge earning is a affected by such considerations as labor productivity, labor cost perunit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistical.

#### EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES-No. 379. INDEXES, BY MONTHS: 1922 TO 1940

NOTE, Monthly average, 1923-25-100. Indexes are based on monthly reports from representative establishments in 90 manufacturing industries. These industries and industry groups are shown in tables 381-383. The base used in computing these Indexes is the 3-year average, 1923-25 taken as 100. Indexes are not adjusted for seasonal variation, Indexes in this table and tables 380-383 have been adjusted to conform with the Federal Biennial Census statistics on factory employment and pay rolls through the year 1937 and supersede the previousty published series. It was not found practicable to follow some of the nodifications made by the 1937 census in industry classifications because comparable data were not available from the censts for the base-period years/1923 and 1925. In such casesthe indexes employment and pay rolls between 1935 and 1937, as inearlier revisions, were adjusted to movements of selected census dataon the assumption that such movements would agree closely withthose of the former census series. For indexes of employment adjusted for seasonal variations, see table 380

I Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 1,800 naunfacturing establishments employing about 60 percent office factory wagecamers in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted the annual State census of manufactures through

1936. Pay-roll indexes are based upon a computation of remployment times average weekly earnings. 2 Compiled by the New York State Department of Labor, based upon monthly reports mately 2,412 manufacturing firms who employ about 38 percent of all the factory workers the Reports: overemployees in both office and shopincluding foremen. Executives and salesmen administrative and sales offices located away from the plants are not covered.

and Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank for 1925 and 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 830 manufacturing plants which account for approximately 60 percent of all wagocarners engaged in manufacturing plants which by the bank in coperation with free U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2.300 manufacturing plants and represent about 59 percent of the wage payments in the manufacturing industries of the State. Indexes are weighted according to the relative importance each industry in the State totals. For Delaware indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of 60 percent of all workers are supported by the state of the state of

4 Compiled by the Illinois Department of Labor, based upon monthly reports from about 2.500 manufacturing plants covering wage carners, (production employees) Reports represent approximately 69 percent of all wage earners engaged in manufacturing incustries or the State and 78 percent of the total wage payments.

3Compiled by the Industrial Commission of Wisconsin, based on monthly reports (covering manual employees only) from representative manufacturers who employ about 81 percent of total factory earners and whose pay rolls are about 83 percent of total factory pay rolls in the State. Employment and pay-roll indexes computed for months through July are weighted relatives of totals. Employment and pay-roll indexes for subsequent months and index 92 Taverage weekly carnings for all months are unweighted relatives. The indexes have been adjusted to Census data through 1935. Comparable indexes for months prior to January 1929are not available.

No. 386. EARNINGS, AVERAGE WEEKLY AND HOURLY, IN 25 MANUFACTURING INDUSTRIES, BY LABOR GROUP3: 1925 TO 1939

NOTE: Index numbers based on 1923 as 100. Data cover a representative number of plants which enployed 1,760,000 workers during 1939. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry revealed by the Federal Biennial Census af Manufactures for 1923. In addition, each labor group 1.8 weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year recognized holidary falls in that week, upon the succeeding week.

Adjusted to census figures through 1935. 2 Adjusted to 1937 census figures for electrical industries.

Covers street railways and trolley and motorbus operations of subsidiary, affiliated, and successor companies.

4.Adjusted to 1937 census figures for electrical industries.

4.Adjusted to 1937 census figures for electrical industries.

<sup>5</sup> Covers year-round hotels having 25 or more guest rooms. Cash payments only; value of board, room, and tips cannot be computed.

Source: Department of Labor, Bureau of Labor Statistics. Indexes are published currently in the Monthly Labor Review and in a pamphlet, "Employment and Pay Rolls."

No. 388.- EMPLOYMENT, PAY ROLLS, AND AVERAGE WEEKLY WAGES FOR FULL-TIME EMPLOYEES, BY OCCUPATIONAL GROUPS, FOR SPECIFIED INDUS-TRIES OR BUSINESSES: 1935

NOTE:Pay-roll figures are in thousands of dollars. Data are for I week in 1935-in general, the week ended October 26, but where this period was not representative figures are for I week of normal ployment. The figures are summarized from reports secured in connection with the 1935 Censusof Business, and coveronly those establishments or concerns which gave detailed information by occupational groups. For the average number of employees (full-time and part-Gine) and total pay rolls 1935 (publication). For references to data for the individual industries and businesses shown BisewnerEmiths publication.

No. 389. WAGE RATES PER HOUR AND HOURS PER WEEK INDEXES OF UNION SCALES IN BUILDING AND PRINTING IRADES, BY UCCUPATIONS: 1909

NOTE. Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1938,72cities were included. Prior to 1938 the figures were based upon the scale prevailing May15 each year. For 1938 and 1939 the study was made as off une 1. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the change in the control of the con regular full-time hours per week, account not being caken of loss of time from slack work or other causes, nor of overtime work

[Rates and hours for 1929=1100]

### No. 391. - STRIKES NUMBER, WORKERS INVOLVED, AND MAN-DAYS IDLE, BY MAJOR ISSUES INVOLVED: 1927 TO 1939

NOTE. – The term "strike" is hereused in the generic sense include all stoppages of work due to Jabor disputes, whether initiated by the employers (lock-outs) te by the workers. Strikes involving fewer than 6 warkers or lasting less than 1 day are not included. Information regarding strikes is obtained principally from the publicpress, union publications, and tradejournals. Reports are also received met various Crovernment labor boards and conciliation services. For the first time, information was also obtained from one of the clothing unions, which began in 1938 to keep a complete record of all strikes conducted by the unfon

### No. 395. EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED FROM PUBLIC WORKS, ADMINISTRATION, FUNDS: 1111 Y, 1933, TO, HUNE, 1940.

NOTE Pay-roll disbursements in thousands of dollars. Construction projects financed by the Public Works Administration are those projects authorized by the National Industrial Recovery Act of three 1933. This program of public works was extended to June 30, 1937, by the Emergency Relief Appropriation Acts of 1953 and 1936. The Public Works Administration was continued until July 1, 1939, by the P.W. A. Extension Actof 1937, and to June 30, 1941, by the P.W. A. Appropriation Actof 1938. Data for employees engaged on force-account projects (projects for which contracts are not let) are duplicated in employment figures given elsewhere for Federal executive service and railroads. Monthly figures coverperiods ended the 15th. Figures for July 1935 and subsequent months include data foremployees working on P. W. projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935, 1936. 1937, and P. W. A. Appropriation Act of 1938. See table 396

#### 15 SOCIAL SECURITY

[Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

GENERAL NOTE

Figures for 1937 published in the 1939 edition of the Statistical Abstract are not comparable with 1938 figures given in tables 401 to 404.

Unemployment Compensation.-The Federal-State unemployment compensation program provides for payments to persons who are ableand willing workbut are unable to find jobs. The contributions collected under State laws are designed to providetofund to be used solely for this purpose. Employers, and in some States employees also, contribute definite proportions of pay rollsand wages to a special fund, from which qualified unemployed workers may draw benefits, limited as a rule by the amount of their prior employment and the wage rate. Under the Social Security Act the Social Security Board

two statutory responsibilities in the administration of the unemployment-compensation program, have certifies eachyear for the Secretary of the Treasury, for normal and additional fax-redefit purposes, the State laws which conform to the standards prescribed; it certifies grants to defray necessary costs of administering the State program for those States which, it Haw administration, conform to the standards prescribed in title III of the act. Funds are certified in Ect amounts determined by the Bhard to be necessary for the proper administration of State laws, including administration of employment services in connection with payment of benefits. Funds for State employment services are also allocated by the Board under the provisions of the Wagner-Peyser Act.

Public Assistance,-under the Social Security Act, the Federal Government shares with the States the costs of assistance given to needy, persons and families. The assistance in which the Federal and State governments are thus collaborating is offtnee types: (1) Ald needy persons aged 65 and over, aid to the needy blind, and (3) to dependent children under that conof fewho have been deprived, apparent support, or under the agaur 18 if regularly attending school. To receive Federal grant under some these programs, a State must submit plan which can be approved by the Social Security Boands, resulting the basic requirements of the attrand, after approval of its plan, must supply with its requests for Federal unds the data required by the Board.

Public assistance under the Social Security Act obviously is related to other forms of public aid maintained by Pederal, State, and local governments. The Social Security Board has therefore undertaken, at the request of other governmental agencies and with their cooperation, to report on all public aid to nersons in new.

#### No. 401. OLD-AGE INSURANCE NUMBER OF EMPLOYEES, BY AGE AND BY SEX, BY INTERYAL OF EARNINGS, FOR THE UNITED STATES: 1938

NOTE. Age at birthday nearestJuly 1,1938. Of the 65 years older group, nearly 80 percent became 65 during 1938 and consequently earned some taxable wagePrc that year before passing the age limit imposed. Figures corrected to Aug. 15, 1940. See headnote, table 402, and general note above

OLD-AGE INSURANCE- NUMBER OF EMPLOYEES IN FOURTH QUARTER No. 404 OF 1938 AND TOTAL AMOUNT OF THEIR 1938 TAXABLE WAGES, BY AGE GROUPS. BY SEX. AND BY INDUSTRIAL DIVISIONS

OTE. Wages in thousands of dollars. This table excludes data for 2,554,210 workerain covered employ ment in the fourth quarter of 1938 and for their caxable wages of \$2,597,877,000 received during 1938 Thesedata could not be included because returns were uncoded industrially, or because workers werein industries other than those listed, dhimecause their sex was unknown. The addition of these data to the totals for workers and wages appearing in the body of the table gives a total of 23,623,916 for workers and \$23,617,456,000 for taxable wages. These totals differ from those in tables and 402 because they pertain only to workers amployed in the fourth quarter 1938 and because notally intensits have been made in this tableto exclude 1937 taxable wages whicher for Identified for posting after Fullyy, 1938, onto include 1938 taxable wages which were identified for posting after May 12, 1939, and additional workers for whom they were reported. Workers in the fourth quarter and their caxable wages for the year were assigned to the industrial group in which they were employed in the fourth quarter; those in multiinaustry employing organizations were aliocated to the primary ndustry, determined by the largest number of employees in such organizations in the United States engageds 5 the same combination of

1 Represents sum of balances at end of month in State clearing account, benefit-payment account, andi Unemployment Trust Fund Account maintained in the U.S. Treasury.

<sup>1</sup> Includes contributions plus penalties and interest collected from employers during 1939. Figures are adjusted for refunds of contribttions and for dishonored contribution checks. Employer contributions of 2.7 percent are collected in all States except the District of Columbia and Michigan, is 3 percent; in New York, the rate is 3 percent for employers covered by State law but TOt@overed by title IX; those employers covered by title IX pay 2.7 percent. Employee contribttions are collected in 6 States.

State accounts SccExceptinterest carned on funds the Jnempioyment Trust Fund which is credited reported by the U.S. Treasury the last montant each quarter. Adjusted for voided benefit checks.

Employee contributions of 1 percent are collected in Alabama, California, Kentucky, and New Jersey; 0.5 percent in Louisiana; and 1.5 percent in Rhode Island.

<sup>67</sup>Under provision of the Connectictt law, administrative grants equal to the preliminary and "liquidating" amounttolbe transferred to the Railroad Unemployment Insurance Account are to be withheld by the Social Security Board, and the State is permitted to withdraw from an employment compensation insurance funds the amounts found necessary for administrative purposes, up to the amount So withheld. As of Dec. 31,1939,\$509,000 had been withheld.

1 Figures from the F. S. A. represents net amount of emergency grant vouchers certified to cases and value of commodities distributed during month. 2Includes earnings of persons certified as need and arnings of all other persons employed on work

and construction profects in anced in whole or in part from Federal funds. Figures for the C. C. O. reprecarnings of enrolled persons only. senffigures through January 1936 represent paymants from State and local funds only. Thereafter, figures represent payments to recipients from Federal, State, and local funds in States administering 3 special

types of public assistance under the Social Sccurity, Act and from State and localfunds onlyith States not participating under the act. After 1939, figures include payments for nospitalzation and burials.

4Figures through March 1937 from the W. P. Division of Statistics. Figures for 1933-35 include

obligations incurred for direct relief, and earnings 7 relief and nonrelief persons (other than of administrative employees) employed under the general relief program of the F.E. R. A.; they also include an estimated amount of obligations incurred for relief extended to cascs by local authorities from public funds under the poorlaws. 1939, figures include payments for nospitaltzation and burials.

5 Figures from the WaxteA., Division of Statistics; include obligations incurred forrelief extended to cases under the emergency education; student aid, rural rehabilitation, and transient programs of the

ergency Relief Administrations largely financed from F. E. R. A. funds.

ErFigures estimated by the C. G. C. by multiplying average monthly number of persons enrolled by an average of \$70 per month through June 1939, for July-October and \$66.25 for November and December. This average amount is based on amount 9 tobligations incurred for cash allowances and for clothing, shelter, subsistence, and medical care persons enrolled, and for certain terms.

Figures for September 1935-June 10EPfrom the W. P. A., Division RStatistics; thereafter, from the Y. A.; represent earnings during all pay-roll periods ended during month.

N Figures from the W. P. A., Division of Statistics; represent earnings of persons employed on projects

opcrated by the and, after June 1938, earnings of persons employed on Federal agency projects fnanced by transferorW. P. A. funds; coverall pay-roll periodsended during month.

9 Figures from the Bureau of Labor Statistics, Division of Construction and Public Employment; represent carnings on other work and construction projects financed whole or in part from Federal lunds and cover all pay-roll periods endedduring monthly, period ended 15th of specified month.

Figures from the W. P. A., Division of Statistics; represent estimated total earnings during month.

No. 418.-RAILROAD RETIREMENT BENEFIT PAYMENTS CERTIFIED TO THE SECRETARY OF THE LREASURY, BY CLASS OF PAYMENT: 1936 TO 1939

NOTE. The Railroad Retirement Act, as passed in 1935 and amendedin 1937, established Federal ment system for railroad employces. Employers under the act include carriers-ratiroads, expressetirepanics, and sleeping-car companies; carrier affliates-Irefrigerator-car loan companies, exampla, organizations such as railroad or traffic associations maintained by 2 or more employers; and standard railway-labor organizations, national in scope. The act provides for 5 classes of retirement benefits:

Employee annuities, both disability and old age, based on an employee's years of service REPhonthly compensation, exclusive of carnings above \$300, with employers under the act. and aver-

(2) Survivor annuitics, paid to the surviving spouse of a deceased employee annuitant

 $are duced annuity during his orher lifetime in order to provide a lifetime annuity for {\color{blue}his} \ \textbf{wither adviced pouse}.$ 

Of a decaded annulus, annulus, paid under the 1935 act to the surviving spouse or dependent next kin of a decaded annulus or of a decaded employee who at the time of his her death was entitled secrible an annulus. These annulus are equal to half the annulus paid or payable to the omployee

(4) Lump-sum death benefits, paid under the 1937 act to designated beneficiary or to the deceased employee's legal representative. These benefits are equal tora percent of the compensation earned as an employee after Dec. 31, 1936 (excluding compensation) in excess of \$300 in month), amount of any employee or survivor annuities that may have been paid's—payable.leftig appayable annuitin's had elected a joint and survivor annuity and his order spouse was alive at the time of this or

her death, the death benefit is not payable until afterthe death the spouse.

63) Rensions paid under the 1937 Act to individuals who were art both March and July 1, 1937, pensions paid under the 1937 Act to individuals who were not eligible on July 1, 1937, for mentals ties based in whole or in part on service prior to Jan. 1, 1937. The pensions are equal in amount to the individual pensions or gratuities granted by employers, but cannot exceed \$120 per month.

The funds of the retirement system come from an equal tax on employers and employees, based on the amount compensation, not in excess of \$300 in any I calendar month, camed by each employed, changes A the tax rate are as follows: Calendar years 1937, 1938, 1939, rate 234 percent; 1940, 1945, rate 344 percent; 1946, 1947, 1948, rate percent; 1949, 1945, rate 344 percent; 1946, 1947, 1948, rate percent; 1949, and stbsequent in the state of the s

<sup>1</sup> In a few cases payments are made to more than 1 survivor on account of the death of a single individual. Such payments are here counted as single items. Terminations include those by death and by expiration of 12-month period for which death-benefit annuities are payable. Practically all terminations are of the

adjustments, by adding the difference between certifications and terminations to Intt**©h**ttyrjared, number in formterend of preceding period. Adjustments include suspensions, returns to service, commuted lump-sum payments, and reinstatements of suspended payments.

I For annutities and pensions in force, residence at timo first check was mailed. For lump-sum death benefits, residence at time checkwas mailed; arbitrarily bones in fluided between 2 or more beneficiaries residing in different States. This was necessary in less than one-halfoft percent of payments. 2 Figures do not represent the number individuals receiving these annuties. Maccases, death benefit

annuity payments were being made mfrithan 1 individual and in 157 cases the same individual was requiving both a survivor annuity and adeath benefit annuity.

31 death benefit annuity at \$16.30 payable to 4 beneficiaries was assigned to North Dakota although 16f the peneticaries receiving \$4.08 resided in Minnesota.

Excluding rural free delivery routes, ocean mail routes, and air mail routes to foreign countries. : Attdited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

International includes foreign countries on domestic basis. For explanation, see headnote, table 425.

Bource: Post Office Department, Annual Report of the Postmaster General.

<sup>:</sup> Data are for continental United States and are estimates except in 1923 and peginning with 1926, when figures are accurate calculations. No estimates madefrom 1914 to 1922, inclusive.

Postage stamps first issuedunder act of Mar. 3, 1847, and placedon sale at New York July 1, 1847.

From Nov. 1864, when money-order system first went into operation to June 30, 1867.

From Septi , 1869, to June 30, 1870.

Oct. 12, 1867.

<sup>5</sup> Gross revenues of department for 1918 and 1919 include \$44,500,000 and 811,292,00, respectively, war-tax revenue accruing from increased postage.

## No. 425. - POSTAL MONEY-ORDER BUSINESS SUMMARY: YEARS ENDED JUNE 30, 1910 TO 1939

NOTE. For revenues from money orders, see table 424. For value of orders issued for other years, see table 423. Money orders are exchanged on a domestic basis not only within this country, but within studying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in 50 Domestic".

## No. 427. TRANSPORTATION OF DOMESTIC MAILS, BY CLASS OF SERVICE: 1915 TO 1939

NOTE. - Amounts, except as indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads authorized and paid for under the space basis system; formerly, payments were based on a systemar quadrennial weighings. Railway mail space units of service vary in size and character and may consist of car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offces, othersAre for. storage only, about 20 slasses of units being distinguished. The Liequated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost transporting normal mailtraffic over regular routes only, based on contracts outstanding at the enddfeach fiscal year. I Annual cost" Includes emergency and side and transfer service. Average rates are based on "regular authorizations"

#### No. 436 TELEPHONE SYSTEMS SUMMARY CLASS A CARRIERS: 1926 TO. 1939

NOTE.—Figures cover Class A telephone carriers which reported for 1939. Class A carriers are those carriers whose average annual operating revenues exceeded \$100,000. The gross operating revenues of Class A carriers reporting in 1937 represented approximately 96 percent of the revenues of all telephone carriers as reported for the Census of Electrical industries for othat year. (See table 431.) The figures include data for carriers consolidated and merged prior to 1939So far as annual data are available. Intercorporate duplications have not been excluded

## 18. POWER

[Data in this section relate to continental United States]

# No. 441 - ENERGY FROM MINERAL FUELS AND WATER POWERANNUAL SUPPLY, BY SOURCE: 1871 TO 1939

NOTELThe figures, except coal equivalent, represent the equivalent of the heating power—the classes of fuel—trillions of British chermal units. Data represent production, except those for alf Imports, and takent account of exports, imports, or changes in stocks

I Fuelequivalentis calculatedfrom Kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise fuel aquivalent is calculated from reported horsepower of installed water wheels. Prior to 1890 data were insatisfactory, but estimates are included in total. Calculated at 26,200,000 British thermal units per fon.

## No. 443.—ELECTRIC ENERGY- PRODUCTION, BY TYPE OF PRIME MOVER: 1920 TO 1939

NOTE. -In thousands kilowatt hours. Figures for 1939 in this table and those in table 442 and in tables 444 to 448 are basedoft kine operation of 1,126 power plants, owned by 1,677 concerns, generating electric energy for sale. The production and capacity of the following types plants are included: Privately owned electric utilities, mining and manufacturing (exclusive of plants or those concerns whose sales were less than 10,000 kilowatt hours per month), railways and railroads, municipal electric utilities. Bureau noncentral stations cooperatives, power districts, State projects, and publicly owned noncentral stations.

Of 2,000 pounds.
Of 42 gallons.
Includes fuel used for standby purposes.
Output by use wood not included.
Output by use of waste not included.

## No. 449.- ELECTRIC LIGHT AND POWER INDUSTRY- SUMMARY: 1902 TO 1937

NOTE. Figures cover engagedeither in the generation and distribution felectricenergy, or the distribution all testagaistic enfelectric energy, to public or private consumers. Statists do not include establishments which consume all current generated, such as manutacturing and mining companies, milroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Covernment or by States were not included unless energy was sold commercially. For Classification of reporting sources for 1947, see table 450

<sup>1</sup> The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. Not available 3 Comprises 1,112 stations operated steam; 1,283 by internal-commbustion; 1,426 by water; and 206

Composite stations having more thanhyype of prime mover).

4 Comprises generated output and energy purchased and received from other sources. Since the energy Received from other sources in 2 large part, purchased from other electric light and power companies, a considerable duplication. Tinvolved as such energy, would also be included in the "Generated." Includes "Estimated value offree scrice."

Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation Otelectric light and power plants and other public ucilities, not distributed among the several utilities. 10In addition, hogged fuel, sawmill, and other waste were reported.

POWER 406

## No. 450. ELECTRIC LIGHT AND POWER INDUSTRY GENERATING FACILITIES. ENERGY GENERATED AND FUEL CONSUMED BY REPORTING SOURCES: 1937

NOTE-The system of classification reporting sources, as shown in this table, is a new one recently adopted by the Bureau of the Censtry collaboration with the Federal Power Commission. This classification differs slightly from that employed by the Federal Power Commission. (See headnote, table 443.) The differences in the figures are due mainly. (1) to the inclusion in the census survey of data for certain small concerns not canvassed by the Federal Power Commission, and (2) to the inclusion in the Federal Power Commission survey of data for a larger proportion of the energy output of certain concerns grouped under "Other sources" than is accounted for in the census survey

## No. 457. WATEL POWER, DEVELOPED AND POTENTIAL: 1921 TO 1940

NOTE. - In thousands of horsepower. Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 10rsepower or more. Fotentisipower figures are 1936 revised estimates showing the 24-hour horsepower available 90 percent of the time and 50 percent of the time at an over-all sfliciency of 70 percent at all leveloped and undeveloped sites. Data for potential power not directly comparable with those for developed power, because developed power is usually given ir eterms of the capacity of installed water wheels or burbines, which may be several times the poton-tial power available 90 percent the time. Probably with completedevelopmentoffthe water-power resources of the whole countrythe installed capacity would amount to 50,000,000 horsepower or more

orded. Also includes 23,800 miles of urban actesions (see also notes), 3,243 miles of which are not under State Control.

See note table 458.

3Includes original and reconstructed surfacing. Inadditionk mileago here shown, strfacing on secondary rural road systems under State control totaled 3,188milest ha937, and 8,238 in 1938, and surfacing on urban extensions of State systems coulded 774 miles in 1937 and 757 milesin 1938.

Includes new location. : Mileage for urban axtensions under State control included with rural roads, as segregation by types was not available.

## No. 460. HIGHWAYS UNDER SUPERVISION OF STATE HIGHWAY DEPARTMENTS DISBURSEMENTS (INCLUDING FEDERAL-AID FUNDS) FOR, BY STATES: 1921 TO 1939

NOTE.—Figures include disbursements, whether from current revenues or the proceeds of loans, for construction, maintenanceinterestand principal payments on highway bonds, transfers to local units, and miscellaneous disDursements. Data beginning 1934 cover calendar years, while figures for carlier years for many States representfiscalyears. For the States reporting on a fiscalyear basis in 1933, the net total disbursements for interimand overlapping periods between 1933 and 1934 amounted to 5124428,000

## No. 469.-- MOTOR-VEHICLE FATALITIES IN CONTINENTAL UNITED STATES: 1914 TO 1938

NOTE. This table covers all deaths from automobile accidents, excluding deaths as a result train and streetar collisions with automobiles, and motorcycle accidents. Rural area and urban arcao feity population figures shown for 1930 to 1933 and used in computing rates for these years are the latest revised estimates. The term "Tural area" includes all rural parts of the registration States excluding cities having populations of 10,000 or more: "urban area" includes all cities having populations of 10,000 or some control of the properties of the pr

#### TEANSPORTATION. AIR AND LAND-STEAM ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR

[Datain this section relate to continental United States unless otherwise stated]

BUSSES, AND CIVIL AERONAUTICS

GENERAL NOTE.-Theterm "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and thefr nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (5)switching and terminal railroads, also reporting to the Commission; and (c)private railroads (defined by the Commission as "circular" because they report on brief circulars and as unofficial"). Except in certain mileagedata the circular and unofficial compantes are not included in any of the statistics. switching and terminalroads were formerly included with operating railways, but are now separated, and

data for them do not appear in most of the tables. Nonoperating subsidiaries include proprietary companies, which are covered by the reports carriers, and lessor companies which have no traffic and whose reports appear only in statistics fr capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I having morethan \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the ngures in each table indicated by notes. Omission of class II and class III railroads affects very little the comparability dr statistics with those of earlier years as regards most items, since the bulk of the business is done by classI.

The Interstate Commerce Commission livides raliroads geographically, into three districts and eight subsidiary regions. Each railroadis treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern districtincludes territory east of Chicago and north of the Ohio and Potomad Rivers; southern district, territory east of the MLIssISsippl River and south of the Ohio and Potomac Rivers;

and western district, the remainder of the country.

Miles of

Class companies make monthly reports from which data are compiled currently and published in a series monthly statements. The yearly totals from these reports become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

#### 471.- STEAM RAILWAYS- MILEAGE OWNED AND MILEAGE OPERATED: 1890 TO 1939

NOTE. Beginning with 1908 switching and terminal roads are omitted (they operate about 2,300 miles of main tracks). The Arst and second columns cover all railways, inciuding, "circular" and "unoffi-olal" lines; the last 5 columns omit 5 circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication undertrackage rights and some mileage in Canada operated by United States companies

I Priorto 1925 figures include investment of leased lines and exclude investment of proprietary companles notrendering annual-reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included as follows: 1925, \$480,216,000, 1926, \$831,574,000; 1927, \$919,095,000; 1928, \$1,013,752,000; 1929, \$1,013,490,000; 1930, \$1,095,631,000; 1931, \$1,114,687,000; 1932, \$1,124,945,000; 1933, \$1,096,264,000; 1934, \$80,851,000; 1935, \$841,716,000; 1936, \$840,033,000. No allowance is made cash and material and supplies, and no deduction is made for depreciation.

Investment originally published is increased by \$170,000,000, estimated reserve for depreclation. Tigures not comparable on account of Federal control accounting requirements.

Does not include returns forlessor companies.

Does not include returns for class II and class III companies.

Source of tables 484 and 485: Interstate Commerce Commission; annual report, Statistics of Railways in the United States.

#### No. 486. - STEAM-RAILWAY FREIGHT SERVICE- TRAIN MILES, CAR MILES, TONNAGE AND RELATED AVERAGES: 1891 TO 1939

NOTE. - Figures prior to 1916 relate to years ended June 30, thereafter to calendar years. Switchingand terminal ronds excluded beginning with 1908, excepts noted. The tonage "per loaded car", for "All roads" is based on revenue tonnage only; and for "Class Iroads" on revenue and nonrevenue tonnage. Tons are of 2,000 pounds

No. 493.-STEAM RAILWAYS REVENUE FREIGHT ORIGINATED AND CARRIED, BY COMMODITY GROUPS, ALL ROADS, 1906 TO 1915, CLASS I ROADS, 1916 TO 1930

NOTE. All figures in thousandsoftonsof 2,000 pounds. Data relate to years anded June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1918 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those after 1916 axcludo both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freightis excluded; this is Slargeiterm in the case of a few commodities, notably coal

Covers collisions, derailments, and other accidents that caused reportable damage to railway property. : Covers accidents associated with train operation resulting in but minor damage, if any, to railway property.

Source: Interstate Commerce Commission, annual Accident Bulletin.

<sup>3</sup>Excludes persons killed and injured at highway grade crossings in connection with derailments and miscellaneous train accidents.

<sup>4</sup>Covers accidents occurring in shops, yards, along the track, or at stations but not connected with the movement of cars or locomotives.

T

No. 497. STBAM-RAILWAY ACCIDENTS-NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1939

NOTE.For various reasons, including fact that returns were required under different the statistics are not strictly comparable. PriorEth@21,train accidents werethose causing damag@C65 propertyin excess of \$150 or any damage a resulting casualty. Thereafter they were considered Psuch when damage exceeded \$150 within dwithout a casualty. Where the damage is less than \$150 and there thereportable casualty it is classified as train-service accident of Fearns for years 1911-1915 include industrial and other nontrain accidents employees only, and for 1908-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custocy

#### No. 502. ELECTRIC RAILWAYS-SUMMARY: 1890 TO 1937

NOTE: The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of the control o

<sup>1</sup> Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,009 car-miles; 1,042,866 car-hours; \$2,388,295, operating reverue; and \$2,412,010, operating EXPENSE.

Includes actual miles by passenger-train cars in passenger and special trains and miles run by such incidentally in freight trains,

Includes 9,247. paggage-car miles. Includes 7,715 Daggage-car miles.

<sup>2</sup> Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

Includes small mileage of tracklying outside United States.

<sup>:</sup> Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were anable to report separately the values of plant and equipment assignable to their railway activities.

SNumber reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Nept. 16. The year; for 1937 represent an average of numbers reported on June 30 and Dec. 31. likeludes 334 trolley-bus operators.

<sup>:</sup> Includes 20,721,000 trollev-buspassengers.

Statistics auxiliary operating revenues of 58,905,000 for 1927 and 591,242,000 for 1922; auxiliary expenses.

S7,822,000 for 1927, and 549,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded sof are a possible for earler years.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Street Raflways and Trolley-Bus and Motorbus Operations.

1 Seeheadnote. 2Number pay roll as of June 30 for 1932 average of number on pay roll as of June 30 and Dec. 31 for 1937. See headnote.

No separate data; included with data for street-railway operations.

No separate data; included with data for street-railway operations.

Auxiliary operations consist essentially ofsale of electric energy and gas. On basis of relative volume

araxpenses and revenues, trolley-bus transportation activities were secondary.

Source of tables 509 and 510: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Street Railways and Trolley-Bus and Motorbus Operations.
