21. WATERWAYS, WATER TRAFFIC, AND SHIPPING

(Data in this section coverthe following areas unless otherwise indicated: From Board of Engineers of the United States Amy, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico and, beginning Jan. 1, 1935, Virgin Islands; from United States!

Generalnote asto urits of measurement. 4 Cargo tonnage" represents weight ofcargo in long tons (2.240 pounds) or short tons (2.000 pounds). All Other tonnage figures refer to capacity of ressels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is transgross and net tonnage refer to space measurement. 100 cubic feet being called 1 ton. Gross tonnage is shear within those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage chapstury of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight nong tons required to depress exessif fromlight water (Lhatis, with only the manchinery and equip ment on board) to load line. It is therefore the weight clear cap, fuel, etc., which a vessel is designed with its normal adultiment. Incl. etc.

No. 515.— WATER-BORNE COMMERCE OF THE UNITED STATES CARGO TONNAGE, FOREIGN AND DOMESTIC: 1933 TO 1938

[In thousands of shorttons of 2,000 pounds]

	1933	1934	1935	1936	1937	1038
Foreign commerce, total.	69,467	77,898	31,640	90,247	114,413	105,182
Imports, through seaports. Exports, through seaports. Imports, Great Lakes ports. Exports, Great Lakes ports-	27,671 31,197 3,034 7,565	30,553 33,570 4,287 9,488	33,943 33,922 4,716 9,059	37,507 37,154 5,423 10,163	13,764 52,910 4,102 13,637	33,886 55,476 5,110 10,710
Domestic commerce, anadjusted total.	377,777	403,027	461,632	559,614	630,620	532,008
Coastwise, between ports. Great Lakes, between ports. Local traffic of seaports and Great Lakes ports! Traffic between seaports andriver points. Source: War Department, United States Army, Office of Chief of Engineers; Annual Report, Part II.

Revised, revision not carrieder totals.

Figures for years prior to 1935 represent gross traffic from Minneapolis, Minn., to New Orleans, La. They include some duplication restiting from the overlapping of traffic carried overeach of the several stretches of the riyer. Figures for 1935to 1938 represent net traffic from Minneapolis to mouth of river, excluding duplication. Nettraffic from Minneapolis to New Orleans in 1934 was 16,038,000 tons. Trafficon Illinois River only.

Not available. See also table 519.

: See also table 519. also passes through Detroit River and therefore in order to avoid duplication, only the difference is credited to Detroit River. ' See also table 518.

22. FOREIGN COMMERCE OF THE UNITED STATES

GENERAL NOTE - All statistics in this section, except table 546and the Ggues for recent years in table 574, are compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce. Statistics of United States foreign trade are published annually in Foreign Commerce and Navigation of the United States and are published currently in Monthly Summary of Foreign Commerce of the United States and are published currently in Monthly Summary of Foreign Commerce of the United States and in mimeographed statements. Except as noted (as, for example, in table 572) the values stated are in United States dollars without reference to changes in the gold content of the dollar. Values stated are in United States dollars without reference to changes in the gold content of the dollar was permitted. States are stated are in 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted depreciate as a result of restriction placed on gold shipments to foreign towns area, which includes Alaska, Elawaii and Puerto Rico, and Leginning Jan. 1935, the Vigin Islands (see headnote, table 545). Other explanations of the trade tables are given the introduction to the annual report, Foreign Commerce and Navigation of the United States.

No. 545. MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORTES AND POSSESSIONS: 1903 TO 1939

IMPORTANT NOTE. This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "statistical customs area," which includes continental United States, Alaska, Hawaii, and Puetro Rico, and, beginning Jan. 1, 1935. Virgin Islands, with all lord states, Alaska, Hawaii, and Pulippine and, and, beginning Jan. 1, 1935. Virgin Islands, with all lord states, including the Philippine and the properties of the pr

included, while the trade-between that part of the customs area outside of continental United States 11 foreign countries sexcluded. Practically all other nations calculate their foreign tradefain the manner followed in the present table; that is, totaling the trade-of the home country with foreign countries and withalloutlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended Due. 30 chrough 1918; thereafter, for years ended Dec. 31

[All fgures in housands of dollars]

No. 557. IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON: 1821 TO 1939

NOTE.-For basis of dollar valtes, see general note, p. 483. From 1821 to 1866, inclusive, the figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. The "ratio of duties to total" based upon the values of imports shownin the table. Figurescoverfiscalyearsended Sept. 30, 1821 to 1842, and June 30. 1843 to 1915; calendar years thereafter

FEARLY AVER-

AGE OR PEAR

Total

No. 560. – EXPORTS OF UNITED STATES MERCHANDISE AND IMPORTS-INDEXES OF QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1939

NOTE. The quantity unit value indexes have been constructed by the so-called "ideal formula," the essential featureamethich the use of the quantities of the several articles as weighting factors of their unit values for each pair years compared. About 265 commodities were included in the direct calculations for both exports — imports. was then assumed that the Prices of articles in each economic class not directly covered had moved 1 in parallel with those of articles cavered and their value, adjusted by the comptted price index, was included in the aggregative totals from which the quantity index for each class was calculated. The index of quantity and unit value of total exports and imports was based on the aggregate the adjusted totals of the classes. In constructing the indexes the dator 1919 were Jinked directly Rof913 and each subsequent year was compared with that preceding. The resulting year-to-year percentages were made into a series by the chain method

5Imports for consumption; see headnote.

Source: See general note, p.483.

No. 563. IMPORTS OF MERCHANDISE, FREE AND DUTIABLE.

NOTE. All figures in thousands of dollars. For basis of dollar values, see general note, p.483. Figures Dataare "general imports" through 1933; "imports for consumption" beginning 1934. The percentage of the dutiable general imports are reported as reexported than of the free general imports. Moreover, 1933, carpet woolused for making carpets and, for 1922 to 1928, wheat imported for milling in bond for For adjusted figures see tablo 492 of the 1925 issue of the Statistical Abstract

No. 578.– EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISTE, BY PRINCIPAL CUSTOMS DISTRICTS: 1860 TO 1939

NOTE. -All figures in chousands of dollars. For basis of dollar values, except axport figures for 1865 and 1870-78, see general note, p-483. Export figures for those yearsrepresent mixed gold and surrency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" chreafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change on slightly affect the comparability of the comparability of the statistics given in the change of the statistics of the comparability of
